

# TELEMETRY OVERLAY

<https://goprotelemetryextractor.com>

## Patterns Pack

The included patterns are

- + GPS SPANISH METRIC (GoPro)
- + BMP SPANISH METRIC (Garmin w/ HR & cadence)
- + GPS ENGLISH METRIC (GoPro)
- + GPS ENGLISH IMPERIAL (GoPro)
- + BMP ENGLISH METRIC (Garmin w/ HR & cadence)
- + BMP SPANISH IMPERIAL (Garmin w/ HR & cadence)

In the Patterns tab of the Gauge section (lower area) you can load the visual appearance of your project as a pattern. You can also import purchased patterns or patterns designed by others. This will load the visual appearance of the Project and Gauges sections, but not things that depend on your loaded video or telemetry data: synchronization, gauge trims, in and out points, project resolution, frame rate...

In the same tab you can save your changes to the pattern and reuse your updated version in new projects with different video and telemetry data.

For more information on how to customize your design, see the general instructions manual and the tutorials.
